Work Experience

Business Analyst | Sapporo Breweries |

Feb 2026 - Present

- Analyze sales, velocity, and distribution metrics across channels (off-premise, on-premise, regional markets)
- Develop and maintain dashboards and reports to track KPIs such as volume, revenue, and market share
- Identify trends and provide actionable insights on product performance, pricing, and promotional effectiveness
- Support forecasting and business planning through data modeling and scenario analysis
- Collaborate with sales, marketing, and operations teams to align insights with strategic initiatives

Data Visualization Intern | Driscoll's | Watsonville, CA

May 2025 - September 2025

- Assisted internal stakeholders with dashboard access, data validation questions, and issue resolution, providing analytical support similar to help desk functions.
- Conducted data collection, cleaning, validation, and integrity checks to prepare high-volume operational datasets for analytical reporting.
- Communicated Key Performance Indicators clearly to cross-functional teams, translating complex data into actionable insights while staying in compliance with company data governance.
- Troubleshooting and debugging data pipelines by identifying, diagnosing, and correcting issues within ETL and reporting workflows.

Human Resources Assistant | Target | Santa Rosa, CA

November 2022 - December 2024

- Collected and validated personnel data supporting enrollment management, staffing allocation, and workforce planning initiatives for the Human Resources department.
- Supported Student Success and operational outcomes by ensuring accurate data reporting and accessible insights for decision-makers.
- Created Excel-based data collection templates to standardize HR reporting, improving data accuracy and reducing errors.
- Utilized Microsoft applications (Excel, PowerPoint, Teams, and SharePoint) to automate reporting tasks and improve operational workflow.
